STACKED CAGES - Shipping on these units is expensive!

These cages are completely assembled. Made with 14 gauge galvanized-after wire. The sides and tops are 1 x 2-inch, the floors are 1/2 x 1-inch, and the fronts are 1 x 1-inch baby saver wire which makes these cages the strongest available. By adding urine guards to the back and sides the cages are kit safe. Dura-Trays® are standard but 26 gauge galvanized trays are also available. The door edges are covered with vinyl door guard and the doors swing outward. Solid metal dividers are used between the divided units.

CALL FOR CUSTOM BUILT PRICING. Since we make these stacked units, you can mix & match levels. You can have different size compartments on each tier.
